---

How to get  
value from the  
CLOUD

How to deal  
with PRIVACY

How to reach  
ENTERPRISE  
GRC maturity

How to benefit  
from  
CONVERGENCE

How to  
optimize your  
INVESTMENTS

How to improve  
INFORMATION  
SECURITY

# Five Hot Topics in IAM

---

User-Centric,  
Privacy,  
national eID  
cards

Privileged  
Access  
Management –  
integrated

Versatility and  
Context

Externalization  
of all 4 A's

IAM in  
Enterprise  
Architectures

# Five Hot Topics in GRC

---

Closing the loop –  
from detective to  
preventive  
Controls

Information  
Governance –  
beyond Access

Extending  
Governance for a  
hybrid IT

Enterprise GRC  
Architectures –  
bridging the gap  
between Business  
and IT

Organizational  
Development for  
Enterprise GRC

# Five Hot Topics in Cloud Computing

---

Understand  
what's really in  
for you in Cloud  
Computing

Hybrid Clouds

Cloud Mesh-Ups,  
Community  
Clouds, Industry  
Clouds

Cloud Governance  
– Services, Risks,  
Security and  
Identity

Cloud Resource  
Planning based on  
Service  
Management

# A 6\*3 Matrix for 2010/2011

Cloud	Privacy	Enterprise GRC	Convergence	Optimization	Information Security
The Hybrid Cloud Strategy	Privacy as part of Information Governance	Organizational Development	Context-based Authentication	IAM and Access Governance Integration	From Technology to Information Security
Service Management Evolution	National eID Card Integration	Enterprise GRC Architecture	Versatile Authentication Platforms	PAM Implementation	(Re-)evaluate Information Rights Management
Cloud Risk & Governance Roadmap	Minimal Disclosure for Customer Trust	IT GRC Technology Enablement	E-SSO, PAM, and more integration	Flexible IAM Architectures	Strategy instead of DLP point solutions

# Summary

---

- ❑ IAM and Cloud convergence
- ❑ Increased privacy awareness
- ❑ eID card initiatives
- ❑ Integration of Enterprise GRC
- ❑ Focus on Information and Processes, not Technology and Portals
