Where is digital technology taking us? Who is in charge?

Barcelona, 3 i 4 de març de 2016

Inici > Portafolis > Activitats > Where is digital technology taking us? Who is in charge?

This in-depth symposium of two days will be spent in a series of workshops, some of which are interactive, and a round table. Discussions will be on such vital questions as: Is technology driving us? What directions are we going in? Do we really want to go in these directions? Who is in charge? Who decides our future? What are the possible futures? What is our social responsibility in this regard? There are currently widely diverse views emerging on such issues as social, care, industrial and military robots, but also on many other contemporary and emerging technologies such as electric cars.

Contact : Pascal @CloudReady_ch +41793092886 hello@responsibility.digital

What

An OPEN LABEL project, to restore trust and confidence in any digital services.

See what you sign!

because

You are what you sign!

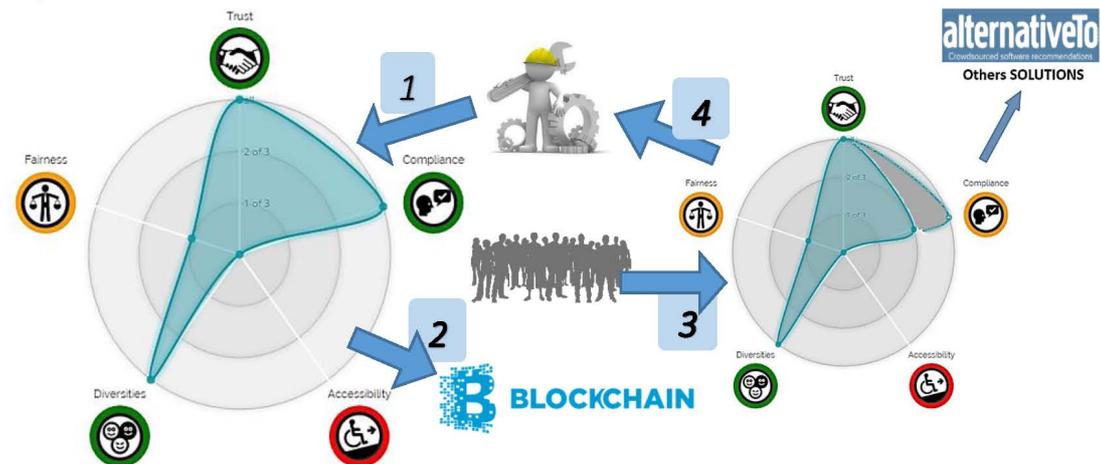

Why

Nobodies read all the **Terms of Services**, and not everything is written. The consequence is a down of trust about web services and less confidence regarding digital providers, particularly. The growing of Internet of Things (IoT) and Big Data, will increase the problem.

Benefits

- Restore the balance for a fair WIN-WIN users/customers and providers.
- Reduce abuse usage our data for more respectful digital services.
- Educate & engage users, to deeper understand risks and abuse.
- Lower time to choose a digital service, for users or enterprises. Improve the choice quality.
- Display clearly the “limits” of service provided, so providers stop deceiving their users/customers.
- Give a better chance for smaller digital service providers, if more respectful humans.
- Gradual: It is not “black or white”, providers can *sign* for partly principles.
- Adaptive: The 15 principles can evolve. Crowd can introduce new. We think it inclusive.
- Trust: With the Blockchain and the crowdsourcing, we can believe in it.
- Cost-less: The Label is not an additional costly, and not always trust-able, “certificated label”...

How

Step 1 – Service provider engage for his intention regarding the DIGITAL RESPONSIBILITY open LABEL: about 15 principles, grouped in 5 main categories. They will be free to granularly agree & engage its services, or not.

Step 2 – We validate and “ENGRAVE” provider’s engagements into Blockchain (Ethereum) [Write once, Read many]

Step 3 – Crowdsourced control: The customers, users, including “freemium” or “free” services, are able to validate “how is compliant” (answering factual qualified questions, from a web browser plugin, similar **WOT**).

Notice: if the provider does not engage into, we are able to graph the “Digital Responsibility” all the same.

Step 4 – Providers can measure how “trusted” his services are. Customer’s expectations into the Terms of Services never red, is matching, not full circle. Users are easier to switch other solutions e.g. using <http://Alternativeto.Net>

From the recent past : this century

Already 10 years for IT-Professionalism with IFIP IP3 (report IP3 at the IFIP Board beginning of March 2016 in Tokyo)

International Professional Practice Partnership
A global partnership to strengthen the IT profession

IP3 Report to IFIP Board Meeting, Tokyo, Japan, March 2016*

**The following report is compiled from Board reports presented, and reported by Members of IP3 to the IP3 Board and from minutes of Board meetings.*

Over the past several months since the General Assembly in South Korea in October, IP3 has continued to actively promote ICT professionalism on the global stage. This report outlines key initiatives, conferences and other activities in which IP3 members have engaged in pursuit of our objectives.

2015 was perhaps the highlight year for IP3 since its foundation as it achieved significant milestones at the United Nations General Assembly, and at WSIS in Geneva. IP3 continued its marketing and push of the ICT Professionalism message to the world. It is best summed up by the comments of the Chair of IP3, Brenda Aynsley, "I'd have to say in brief that it [2015 at WSIS] has been the best for us, we are approached and engaged by others, and the Professionalism message is beginning to be recognised."

From the IFIP circles

The recent IFIP Workshop TC9 WG 9.2 in Barcelona (3rd and 4th of March 2016 on « Where is digital technology taking us ? Who is in charge ? » some outcomes

The screenshot shows the website for the IFIP Workshop TC9 WG 9.2 in Barcelona. The header includes the logo for 'esbrina' and navigation links: INICI, EL GRUP, LES PERSONES, PORTAFOLIS, and BLOG. The main banner features the title 'Where is digital technology taking us? Who is in charge?' and the dates 'Barcelona, 3 i 4 de març de 2016'. Below the banner, there is a breadcrumb trail: 'Inici > Portafolis > Activitats > Where is digital technology taking us? Who is in charge?'. The main text describes the workshop as an in-depth symposium of two days with interactive workshops and a round table. It lists key questions: 'Is technology driving us? What directions are we going in? Do we really want to go in these directions? Who is in charge? Who decides our future? What are the possible futures? What is our social responsibility in this regard?'. It also mentions emerging technologies like social, care, industrial, and military robots, and electric cars. On the right side, there are two green boxes: one for the dates 'March 3rd and 4th, 2016' and another for the location 'Room 240, Edifici Llevant, 2nd floor, Universitat de Barcelona, Campus Mundet, Passeig de la Vall d'Hebron, Barcelona, CP 08035'.

Thematic Workshop 

Triple Win of Information Security Education and Solidarity Initiative: "What is ISES, Why it is Paramount, and How to Implement" (ISES)

Monday 2 May 2016 09:00 – 10:45
Room K – ITU

"Each individual in LDC which understands more from security, can better protect itself to the good of the whole world."
Prof. Dr. Bernhard M. Hemmerli, SATW.

 **SATW**
Schweizerische Akademie der Technischen Wissenschaften
Académie suisse des sciences techniques
Accademia Svizzera delle scienze tecniche
Swiss Academy of Engineering Sciences

"If we think our job is done by shipping loads of hardware, organized criminals will be happy to (ab)use it."
Prof. Konrad Marturf, Lucerne Business School.

"Unless support is provided to emerging markets where resources, capacity, legal and technical training are limited, we could be creating a security divide between the rich and poor nations."
Serah Francis, NTNU, Norway.

"Try to exchange on concrete (realistic) measures to promote SDGs."
Raymond Morel, IFIP & SATW.

Debated issues

- Stimulate large supplier to participate in ISES
- Engaging ISES activity with a large and situation tailored catalogue for bi- and multilateral support systems.
- Creating awareness of the diversity of approaches from policy level to strategic level
- Enhancing strong knowledge exchange and educational mutual support and especially new opportunities to balance the gender issue

IFIP Steps Toward Digital Equity: WITFOR (World IT Forum) - International Federation for Information Processing (IFIP)

Thematic Workshop

IFIP Steps Toward Digital Equity: WITFOR (International Federation for Information Processing - IFIP)

Monday 2 May 2016

16:30 – 18:15

Room A - ITU

"WITFOR intends to bring together politicians, policymakers, researchers and practitioners from developed, emerging and developing countries to discuss together ICT policies and practical experiences."

Leon Strous. IFIP.

"WITFOR should maintain the spirit and ideas of its first editions even if the circumstances have obliged to change its format".

Ahmed Elsherbini. ITU

Relevance with the WSIS Action Lines – please specify the Action lines C1 to C11

Digital Equity is a common aspect to all Action Lines

Debated issues

- This workshop was devoted to show how IFIP is working to promote the Digital Equity. The presentations by the speakers followed the established plan, after a short presentation of what is Digital Equity.
- Leon Strous (strous@ise.nl), IFIP President presented the general goals and the topics addressed by WITFOR since its beginning in 2003 in Vilnius (LT) and followed in the successive editions (Gaborone (BW) in 2005, Addis Ababa (ET) in 2007 and Delhi (IN) in 2012).
- Ramon Puigjaner (pubi@uib.cat), IFIP Vice-President presented the particular goals and activities to be held in the 2016 edition and about the current situation of the conference organization (goals and topics proposed in the call for papers, keynote speakers, parallel activities, analysis of the submitted papers, and relation of the WITFOR 2016 topics with the SDGs and the WSIS Action lines).
- Ahmed Elsherbini (ahmed.elsherbini@itu.int), Chief, Conferences and Publications Department, International Telecommunication Union, ITU, for his position in the ITU presented how activities like WITFOR cooperate with the general goals of ITU, in general, and with those of WSIS, in particular. Also he presented the differences he found between the spirit of the first editions of WITFOR and the current one.

The Contribution IFIP IP3 Makes to WSIS SDGs, with an Emphasis on Providing Trustworthy ICT Infrastructure and Services (International Federation for Information Processing - IFIP / International Professional Practice Partnership - IP3)

Thematic Workshop

The Contribution IFIP IP3 Makes to WSIS SDGs, with an Emphasis on Providing Trustworthy ICT Infrastructure and Services (International Federation for Information Processing - IFIP / International Professional Practice Partnership - IP3)

Thursday 5 May 2016

09:00 – 10:45

Room L - ITU

"Stop talking about ICT jobs, rather consider the ICT profession in the same light as the medical profession. Some will work for organizations, some will set up their own practices"

Brenda Aynsley, IFIP IP3

International
Professional
Practice
Partnership

Transforming IT Professional Practice

"The changes are so profound that, from the perspective of human history, there has never been a time of greater promise or potential peril. My concern, however, is that decision makers are too often caught in traditional, linear (and non-disruptive) thinking or too absorbed by immediate concerns to think strategically about the forces of disruption and innovation shaping our future."
Dr Klaus Schwab, World Economic Forum (he was not in the audience but was quoted).

Relevance with the WSIS Action Lines – please specify the Action lines C1 to C11:
C1, C2, c3

Debated Issues

A respected ICT industry, where the workers are trusted and capable, provides a basis for economic growth in a country, because ICT skills are easy to export (without the workers leaving the country, hence skills are not lost). IFIP IP3's global professional standard provides for skills and knowledge to be accredited against a common framework – thus we can determine equivalent skills for any ICT Professional anywhere in the world.

Training on digital skills should be made available on free platforms to all especially in developing countries. Because of the prevalence of internet connectivity via mobile phones, learning must be mobile-friendly. Ensuring inclusive and equitable quality education, and promoting life-long learning opportunities for all requires stable yet innovative learning platforms, which must be provided by skilled ICT professionals.

There is a need to focus on ICT as a profession rather than a number of jobs.

(E/F)

Relevance with the WSIS Action Lines – C7 and C4

Debated Issues

This session explored actions us related to supporting SDG 4 'Education' of the Education 2030 agenda, with a focus on supporting innovative strategies for access to quality learning opportunities, including through approaches related to access to knowledge and digital literacy for learners and teachers in the 21st Century. Discussions focused on elearning initiatives, the role of openly licensed educational resources (OER), teacher education for the use of ICT in education.

During the Round Table on on 'Digital Competency Frameworks for Teachers and Learners' in the 21st Century – What, Why, Laureates of the WSIS 2016 Awards, Ms Cristina Cardenas presented the MEXICOX-PLATFORM of Massive Open Online Courses (MOOCs) of Mexico and Dr. Omar Alsaleh, the project on Digital Courses Development Initiative, at the King Saud University, Saudi Arabia. Zeynep Varoglu, UNESCO presented on Digital Literacy and international initiatives related to the ICT Competency Framework for Teachers Harnessing and Open Educational Resources (OER). The session was concluded by a presentation by Mr Raymond Morel of IFIP who focused on informatics and digital technologies in school education and in society.

Main Outcomes of the Session

Ms Cardenas provided an overview of the Digital Inclusion and Literacy programme in Mexico and presented the MexicoX Platform – a MOOC aimed at spreading access to education in Mexico.

Mr Saleh provided an overview of the development of the Elearning programme at King Saud University. Mr Saleh highlighted that the development of findings of this initiative were that developing 16 per cent of courses saves 37 per cent of teaching load in digital format.

Contributions of Swiss Engineering inside WSIS Forum 2016

Towards a code of conduct in Engineering and ICTs (SwissEngineering, Ingénieurs du Monde and International Network of Women Engineers & Scientists)

WSIS Forum 2016: Programme Brochure

Thematic Workshop

Towards a code of conduct in Engineering and ICTs
(SwissEngineering, Ingénieurs du Monde and International
Network of Women Engineers & Scientists)

Monday 2 May 2016

11:00 – 13:00

Room Popov 1 - ITU

"Because letting your data in the cloud has as consequence partly loss of control, individual and collective responsibility are important topics related to privacy."

Cario Guidetti Swisscom

"Digital responsibility must be at 3 levels, States, communities and individuals."

Reine Essombadje Evolving Consulting France-Cameroon

"We have to take example on ISO 26000 related to social responsibility."

Raymond MOREL, Secretary General Ingénieurs du Monde

"Don't forget to measure what you treasure, so to get real and concrete actions on the field for Humanity progress."

Yvette Ramos, swissengineering romandie

"We build a better future worldwide through the women's participation in ICTs, and projects linking hot topics including health, safety, gender equality, for a sustainable and inclusive development."

Kang-Joo Lee, President of INWES

Debated Issues

- Ethics in general and codes of conduct in particular, in engineering societies working with and for ICTs, is a vast subject that can be approached from different perspectives.
- One approach was given by the Telecom operator and service provider Swisscom who has chosen the Ethics of cloud computing view point, bringing to the front all aspects of responsibilities, individual and collective.
- Other speakers chose to debate on socio-economical impacts and the digital abyss between regions of the World, urban and rural areas, and the relevance of so called smartcities which integrate the all-connected technologies all along the human journey.

BFH Centre for the Digital Society

The BFH Centre for the Digital Society focuses on the enormous opportunities and risk-laden changes inherent in the ongoing process of digitalisation. It develops ICT solutions and concepts designed to promote the intelligent, secure and fair use of information in all sectors of business, society and politics.

Profile Application fields Expertise Reference projects Services offered

The BFH Centre for the Digital Society was created because the digitalisation taking place in all areas of life generates both tremendous opportunities for social, economic and political progress as well as risks. Miscalculating the complexity or the side effects of these developments often leads to the risks as well as the opportunities being ignored in equal measure.

The BFH centre addresses both sides of the coin – an understanding of the big picture and the identification of sustainable strategies for the future along with the design and correct technical and organisational implementation of projects. To accomplish this, it prioritises networking, both internally in the form of teamwork and externally with leading experts and decision-makers, because knowledge must flow in order to be of the greatest possible use.

Partners

The partners of the BFH Centre for the Digital Society come from the areas of science, business, public administration and civil society. They contribute outstanding expertise, boast their own excellent networks and/or represent leading institutions.

Cooperations

The BFH Centre for the Digital Society is committed to increasing cooperation between Switzerland's stakeholders, e.g. in the area of eID (electronic identity), and it has the privilege of working together with partners abroad on frequent international projects.

After the 2016 Swiss IGF held on 24 May in the Kursaal in Bern

2016: Messages from Bern

The annual Swiss IGF 2016 in Bern was a plain success again with more than 1000 participants from all over the world. The event was well received by the Swiss society. This year's key topics on the program [\(link to the program\)](#) were appreciated and showed intensive debates about Swiss Data policy, Blocking reform. The workshops proved to be an excellent complement again. As mentioned in the Messages from Bern, they will be submitted to the European forum EuroDIG ([EuroDIG](#)) at the end of the year.

Being active and concrete in Information Society with the Public Sector via GOVJAM-Geneva-2016

**GOVJAM Geneva 2016 - Public Service gSpot (v0.1)
Embodies the values and enables the Living Lab initiative approach**

#GVA GovJam16

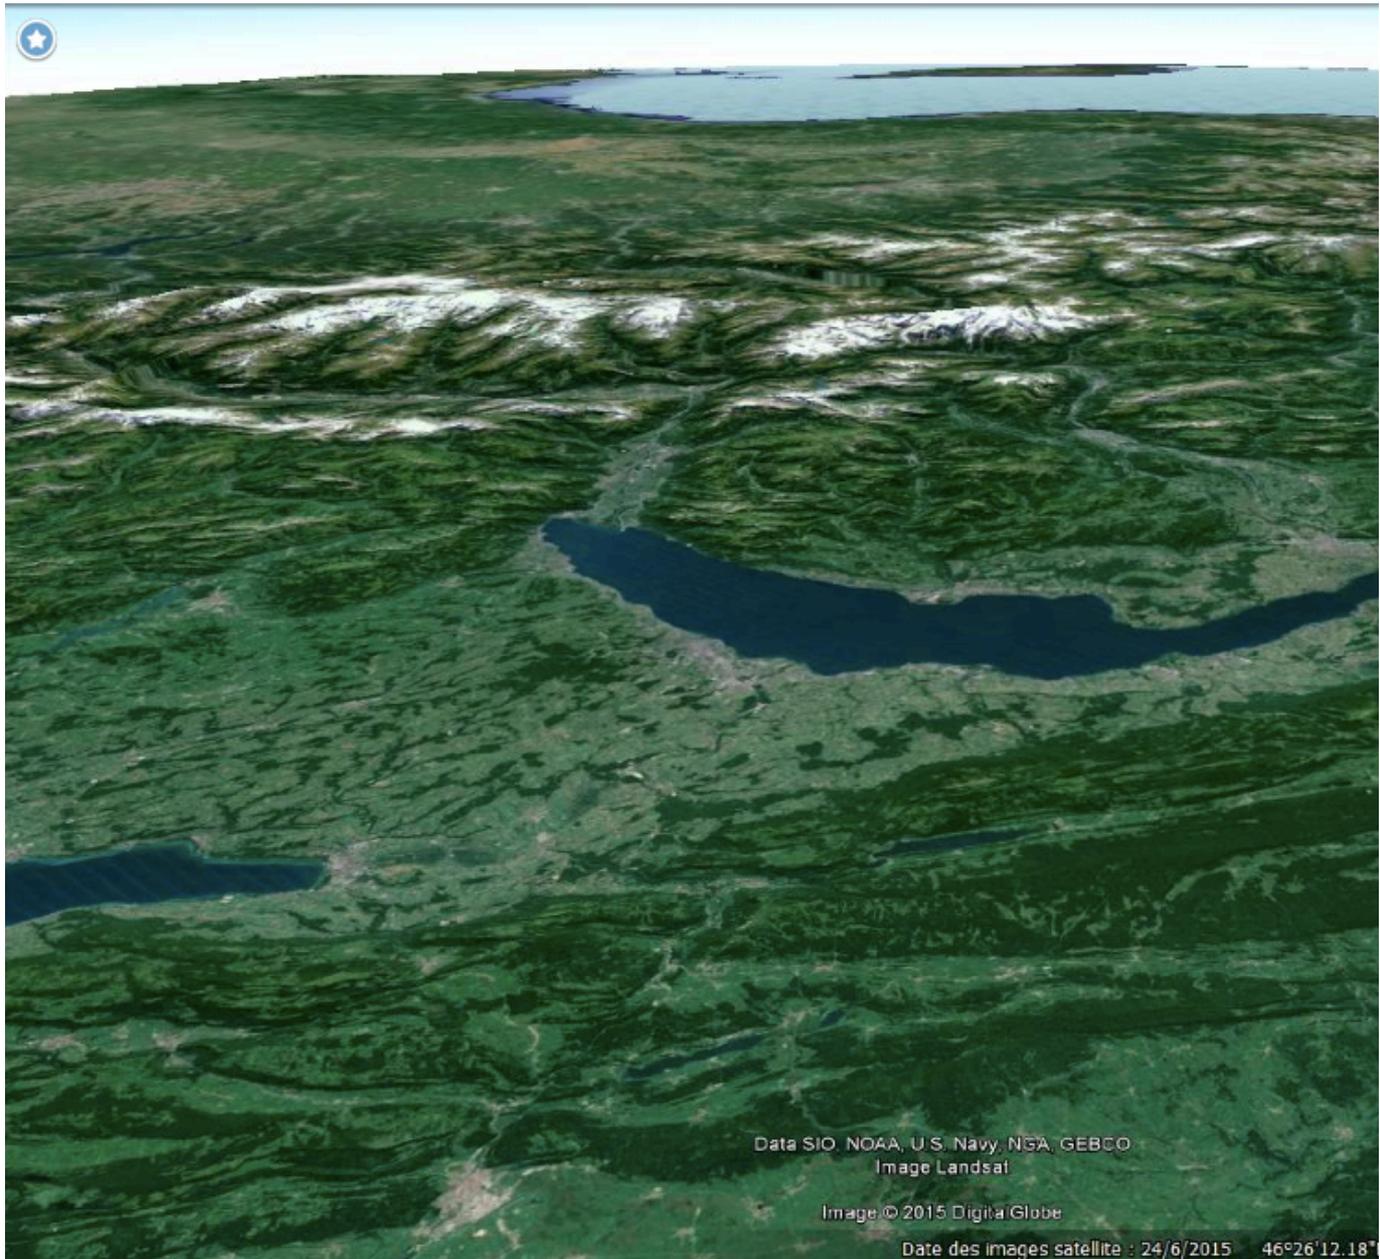

Du 31 mai au 1 juin – Battelle

Think Services, sous l'impulsion du professeur Jean-Henry Morin de [l'Institut de Science de Service Informationnel](#) participera au [Global GovJam 2016](#). Ces 'sprints de l'innovation dans le secteur public' sont lancés simultanément dans de très nombreux pays sur un thème que les participants ne découvrent qu'à la dernière minute. Ils constituent tout à la fois pour eux l'occasion de cultiver des relations hors de leur cadre de travail habituel, de tester des outils de créativité et d'échanger des idées nouvelles, tout en élaborant un projet concret s'inscrivant dans le thème donné. Ici pas de concours, pas de prix; seulement la satisfaction d'avoir réalisé ensemble l'ébauche (ou plus) d'un projet innovant et d'avoir enrichi les réflexions de la communauté internationale des participants.

L'informatique dans l'éducation - Rapport d'un groupe de travail du Département fédéral l'Intérieur suite à l'interpellation Petitpierre du 7 octobre 1981

L'informatique dans l'éducation

Rapport d'un groupe de travail du Département fédéral de l'Intérieur

Table des matières

Avant-propos	54
1. L'importance sociale et politique de l'informatique	55
1.1. L'informatique dans notre société	55
1.2. Informatique et éducation	56
1.3. Formation générale et spécialisation	56
1.4. Tâches essentielles de la Confédération et des cantons en matière d'informatique	57
2. La situation actuelle de l'informatique dans le système éducatif	57
2.1. La scolarité obligatoire (jusqu'à la 9e année)	58
2.2. Ecoles secondaires supérieures (dès la 10e année)	58
2.3. La formation professionnelle en informatique	61
2.3.1. Hautes écoles, ETS	61
2.3.2. Formation professionnelle	61
2.3.3. Rattrapage	62
2.3.4. Formation continue et formation de spécialistes	62
2.4. La situation dans d'autres pays industrialisés	62
3. Les problèmes soulevés par une interpellation	63
3.1. Première question	63
3.2. Deuxième question	64
3.3. Troisième question	66
3.4. Quatrième question	66
3.5. Cinquième question	67
3.6. Sixième question	67
Annexe: interpellation Petitpierre	68
