Session Format: Panel - 60 Min

11. TH1040-Democratic Approach to the IRPC

A Democratic Framework to Interpret Open Internet Principles:

Putting Open Internet Principles to Work for Democracy

Overview

An open internet – where all citizens can freely express themselves, share and debate ideas, and conduct commerce – is an essential part of a modern, vibrant democracy. Ensuring that the internet remains both open and accessible is necessary to strengthen democratic engagement, enable equal participation in the market economy, and promote social accountability.

The increasing shift of political and social discourse to online platforms has led to a corresponding rise by anti-democratic actors in the use of the internet as a tool that can silence dissent, promote violence, and perpetuate prevailing inequalities, including regarding access and use. The new and rapidly evolving nature of the internet means many citizens are unaware or misinformed of how their fundamental rights such as to speech, assembly, and association apply in a digital world.

12. TU0900-IEEE-Global-Initiative-for-Ethical-Considerations-of-AS

IEEE Global Initiative for Ethical Considerations of AS

[The IEEE Global Initiative for Ethical Considerations in Artificial Intelligence and Autonomous Systems \(AI/AS\)](#) was launched in April of 2016 to move beyond both the paranoia and the uncritical admiration regarding autonomous and intelligent technologies and to show that aligning technology with ethical values will help advance innovation with these new tools while diminishing fear in the process.

The goal of The IEEE Global Initiative is to incorporate ethical aspects of human wellbeing that may not automatically be considered in the current design and manufacture of AIS technologies and to reframe the

With the increased adoption of digital technologies around the world, digital data has become a vital component of international trade. The surge of digital flows has been huge over the last 15 years, accounting for larger impact on GDP growth than traditional trade in goods according to McKinsey Global Institute. Moreover, data flows affect all segments of modern economy ranging from traditional industries to the start-ups.

Discussion on the relationship between data policies and trade policies are emerging in the

14. IGF DYNAMIC COALITION ON TRADE AND THE INTERNET RESOLUTION ON TRANSPARENCY

You are suggesting

IGF DYNAMIC COALITION ON TRADE AND THE INTERNET

RESOLUTION ON TRANSPARENCY

ADOPTED AT THE 2017 INTERNET GOVERNANCE FORUM ON DECEMBER 19, 2017

PREAMBLE

Access to the free and open Internet has the potential to create benefits in all aspects of our daily life. The Internet is a tool to combat inequality, accelerate development and it enables individuals to exercise their human rights online and offline.

If international trade agreements support a free and open Internet, which is just, fair, and development oriented and furthers the interoperability

15. LT-17122017-Richard Hill - «Genève peut réguler le cyberspace»

GOUVERNANCE

Richard Hill: «Genève peut réguler le cyberspace»

Richard Hill est optimiste concernant les Geneva Digital Talks. Pour cet activiste et administrateur de l'Internet Society en Suisse, le bout du Léman a la capacité d'abriter un centre mondial d'enquêtes contre les attaques informatiques
