Executive Summary of the Outcomes

(Please note that this is work in progress as the Open Consultation Process is ongoing)

I. Open Consultation Process: A bottom up approach to building the agenda of the WSIS Forum

The Agenda and Program of the WSIS Forum 2016 is being designed in collaboration with the multi-stakeholders on the basis of official submissions received during the Open Consultation Process on the thematic aspects and innovations of the format of the WSIS Forum 2016. Involving all WSIS Stakeholders (governments, civil society, private sector entities, academia and international organizations), this process aims to ensure an active participation of different players during the event. The process began in November 2015 and is structured in five phases that includes online submissions and physical meetings. All related information can be found at: <http://www.itu.int/net4/wsis/forum/2016/OCP/>

II. Official Submissions received

All stakeholders were invited to contribute their formal inputs towards shaping the themes and format of the WSIS Forum 2016 through the online official submission form and physical meetings. The ITU-WSIS Secretariat received more than 115 submissions containing proposals on the thematic aspects and innovations on the format of the WSIS Forum 2016, including binding requests for partnerships, workshops, exhibition spaces and so on.

III. Please see below the submissions by Stakeholder Type:

IV. Please see below the submissions by Regions:

V. Summary of Outcomes:

Submissions to the OCP are made through the official online submission form, available on the WSIS Forum 2016 official website and the physical meetings. In the official submissions received the WSIS Stakeholder community expressed that the structure and programme of the WSIS Forum 2016 could be built in a way that allows for further planning and **implementation of WSIS beyond 2015 in line with the High-Level meeting Outcome Document** and at the same time **aligns the WSIS Objectives with those of the Sustainable Development Agenda 2030**. The UNGA Resolution [70/125](#) recognized the necessity of holding the WSIS Forum on an annual basis and called for a **close alignment between WSIS and SDG processes**. Reaffirming this, stakeholders stressed that the **WSIS Forum is an excellent venue to connect the two processes**, however it was highlighted that special attention should be given to develop **frameworks for collaborative multistakeholder work** towards the alignment of the two processes and communities.

WSIS stakeholders highlighted that the WSIS Forum 2016 will be significant as it will bring together the WSIS multistakeholder community for the first time after the UNGA review. Some suggested that the Forum could elaborate **a road- map for 2016** that could serve as a reference point/ guideline to be used for stakeholders to plan their respective activities and actions, while others suggested that it could also serve as a **coordinating point for developing a 10 year action**

WSIS Forum 2016: Open Consultation Process Preliminary Draft 1.0

framework to guide WSIS Action Lines till 2025, thereby also identifying the opportunities and challenges.

The WSIS SDGs Matrix was widely appreciated by all stakeholders as an excellent tool and it was suggested that the **WSIS –SDGs Matrix could be extended/enhanced** with the WSIS +10 outcome document. The Matrix could also be used to showcase **concrete examples of implementation**. One way suggested could be to explore **cross cutting topics** like Women Empowerment, inclusion of people with specific needs, persons with disability, accessibility, education, capacity building and so on.

Contributors to the open consultation process highlighted that the WSIS Forum has great potential to channel input from multiple stakeholders and make use of the wide reaching networks to stimulate discussions on innovative solutions and identify best practices around the world. It also serves as a platform for sharing current knowledge and creating new visions for how ICTs can be incorporated into the newly adopted SDGs.

Regarding **alignment with the SDGs**, there were suggestions for the WSIS Forum 2016 to focus on SDGs and pay additional attention to specific SDGs such as SDG 9 (Infrastructure), SDG 4 (Education), SDG 16 (Institutions), among others. Also, there were suggestions for the WSIS Forum 2016 to produce a **final document on annual WSIS contribution to SDGs** and also for WSIS to compile proposals towards the High-Level Events for the reviews of outcomes of the 2030 Agenda for Sustainable Development process.

In addition, in order to strengthen the WSIS Forum Outcomes stakeholders expressed the need for a **regular review of the progress in the implementation of the WSIS Action lines**. Some suggested that the outcomes of the WSIS Forum could be linked clearly to the SDGs.

In order to facilitate closer cooperation between WSIS and the 2030 Agenda and to encourage knowledge exchange between the two processes, **inviting core people involved in the implementation of the 2030 Agenda** was suggested. This was considered as essential to deepen their knowledge of WSIS Process, in particular the WSIS Action Lines.

To get a better **understanding of the ICT Ecosystem post the WSIS UNGA review**, stakeholders recommended that a few keynote speakers could be invited to draw a prospective landscape for ICTs in 20 years from now, in particular engineers, scientists, anthropologists, sociologists, economists and so on. To understand the **WSIS Process better** one suggestion was to provide briefing sessions from agencies engaged in the WSIS Process to all stakeholders, while another suggestion was to develop an online course on the WSIS Process. A **joint communication strategy** to inform general public about the WSIS Process and Implementation of SDGs was also suggested.

It was felt that to address the development needs and rapid changes in the ICT Ecosystem, the private sector can play a vital role to achieve the SDGs. Hence, it was suggested that the **private sector should be invited and encouraged to participate in the WSIS and SDG processes**.

WSIS Forum 2016: Open Consultation Process Preliminary Draft 1.0

Highlighting the industry perspective, it was emphasized that it is challenging for small businesses to participate and ways to get them to participate physically in the WSIS Forum need to be discovered.

Stakeholders strongly reiterated that the WSIS Forum is an excellent opportunity to gather **experiences, showcase success stories and to get input from multitude of stakeholders** on the implementation of the WSIS Action Lines. WSIS Forum should strive to offer a platform that collects, strengthens and spreads information related to the Information Society for all stakeholders.

WSIS stakeholders provided several suggestions on strengthening the outcome of the WSIS Forum including :

- Each Annual Forum should continue producing a **consolidated document containing the outcomes**, as well as the meetings' agendas, workshops, ministerial roundtables, dialogue tables, etc. to provide a summary of the findings.
- **Result-focused approach** for each session and workshop should be applied: Each session should generate a concrete outcome for future reference.
- **WSIS Action Lines should present a concise annual progress report** consisting of emerging trends, statistics and supplemented by case studies if necessary, to be presented during the WSIS Action Line Facilitation Meetings and WSIS Action Line Facilitators Meeting, and forwarded to the UN follow ups of WSIS and SDG processes.
- **Annual progress review of WSIS process and its contribution to 2030 Agenda for Sustainable Development** should be prepared as an outcome of the WSIS Forum.
- **Annual report and sharing of examples of global best practices through the WSIS Stocktaking**
- Annual review by **Partnership on Measuring ICT for Development** might enrich monitoring of implementation of the WSIS outcomes
- Further collaboration and implementation of the **WSIS Action lines and SDGs Matrix**

VI. The following themes and topics were suggested by the WSIS Stakeholders during the WSIS Forum 2016 Open Consultation Process:

- **SDGs**
 - Linking the 17th SDGs with the WSIS Process (WSIS action lines)
 - How can ICTs accelerate Countries progress toward SDGs
 - Leveraging ICT to support the SDG on trade growth for least developed countries

WSIS Forum 2016: Open Consultation Process

Preliminary Draft 1.0

- **ICT Infrastructure**
 - Infrastructure for a universal and affordable access to ICTs
 - Innovative PPP models for ICT infrastructure development in rural and remote areas.
 - Economics of ICT infrastructure in developing countries.
 - Evolving broadband technology and applications lowering the cost for bringing ICT to all.
 - Promote investment in infrastructure
- Internet and connected ICTs as a critical enabler for economic and social progress
- Hate Speech and Online Misogyny
- Multistakeholder Internet security
- Net neutrality Frameworks
- Freedom of expression and civil rights as regards ICTs use
- **ICTs and Human Rights:**
 - ICTs driver of promoting Indigenous peoples human rights links to appropriate technology and economic growth
 - Rights of the marginalized
 - Technical neutrality of Human Rights
- **Cybersecurity**
 - Cyber Space is global, but not globally available on same security level
 - Regulatory, policy and Legal frameworks for addressing cyber security challenges at national, regional and international levels.
 - Enhancing cooperation in cybersecurity.
 - Cyber Crime
 - Online Protection for Children: Protection of children, women and girls from ICT related violence, exploitation and abuse
 - Building confidence and security in the use of ICTs, notably on topics such as personal data protection, privacy, security and robustness of networks.
 - Enhancing national and regional capacity to address cyber security challenges by encouraging a culture of responsibility and joint efforts of all involved parties according to their roles to address
 - Since cyber legal frameworks are critical for success of cyber security and cybercrime regimes, it is proposed to include the elements of examining and analyzing cyber legal principles as also legal and policy related issues impacting cybercrime and cyber security
- **ICTs for Gender equality**
 - Empower women and facilitate their integration into the information society through a more equal market access with the use of digital technologies.
 - Gender perspective and women empowerment and ICTs.

WSIS Forum 2016: Open Consultation Process

Preliminary Draft 1.0

- Efforts to address the gender digital divide.
- How can ICTs leapfrog the barriers of infrastructure, sanitation and safety that keep girls out of school?
- How can ICTs leapfrog the barriers of infrastructure, sanitation and safety that keep girls out of school?
- Digital Financial Inclusion initiative for women
- Reintegrating women into tech workforce through e-skills training
- Women Engineers and ICTs
- The Digital Solidarity Fund for women's empowerment: Analyse gap between perceptions and actions
- New Financial options for women's empowerment in Implementation WSIS beyond 2015
- **Internet governance:**
 - Action, policy and cognitive process
 - Multistakeholder mechanisms to enhance Internet security
 - Governance of the Services and Quality in the Internet
- **Inclusion:**
 - Digital inclusion of people with specific needs
 - Digital inclusion of persons with disabilities
 - ICT can create enormous employment opportunities for **Persons with disabilities and special needs:** E-Employment for persons with disabilities in its discussion topics.
 - ICTs continue to be a key enabler for providing a platform for innovative employment opportunities, particularly for the youth, women, persons with disabilities and indigenous people
 - Women and youth apart from local content are needed in order to tackle the needs of the future emerging information society.
 - Connect the unconnected (specially people with disability, empowering women and young girls through ICT)
 - ICTs for the enablement of the LGBT community.
- **Enabling Environment**
 - Enabling competition and equal market access to everyone in the world
 - Principles for legal frameworks to be adopted by countries for promoting their domestic ICT markets.
- **Smart Sustainable Cities**
- **Impact of ICTs in people's everyday lives.**
- **Cloud of things**
- **E Agriculture**
- Preserve the **cultural heritage** and traditional way of life of Indigenous peoples

WSIS Forum 2016: Open Consultation Process

Preliminary Draft 1.0

- Uses of **ICTs for conflict prevention**, mediation and Reconciliation, Land and natural resources conflict prevention
- **Telecentre movement**
- **Monitoring, targets and Indicators** for an open and inclusive information/knowledge society for all beyond 2015
 - New targets for the growth of access, inclusiveness, sustainability, innovation and partnerships in ICTs were agreed by the international community at the ITU Plenipotentiary Conference in 2014.
 - Efforts to improve the extent of data collection and analysis, including:
 - More extensive data collection and analysis
 - More attention to impact
 - More disaggregation of data
 - Integration of monitoring and measurement of WSIS outcomes and of SDGs
 - Attention to building the capacity of national statistical offices
- **Affordable ICTs**
- Focus on **transfer of technology** to developing countries: WSIS Forum should highlight the initiatives and programs worldwide that can become key stakeholders and partners in helping countries to develop their digital platform.
- **ICTs and Education:**
 - Smart people: Digital Education; Centre for learning new technologies and internet in schools
 - How to take advantage of the abundance of education resources on the internet
- **Capacity Building**
 - How can ICTs create economies of scale for investment in teacher training?
 - How can multistakeholder partnerships be used to promote capacity building
 - capacity-building for policymakers
 - Technical capacity in developing countries, enabling them to become contributors as well as users of the Information Society
- Educating Stakeholders on WSIS Activities
- Digital Divide, Digital Disruption, Digital Sovereignty
- **E-business:**
 - Impact of e-business on SDG goal 17, target 11, which aims to "significantly increase the exports of developing countries, in particular with a view to doubling the least developed countries' share of global exports by 2020.
 - ICT enabled trade, e Trade and e-commerce
- **Codes of conduct** in the digital world

WSIS Forum 2016: Open Consultation Process Preliminary Draft 1.0

- The role of **science and research** in developing the Information Society and Knowledge Societies
- E-Science Ecosystem and Collaborative Knowledge Societies
- **Digital literacy**;
 - Universal Service/Access;
 - Sustainable and Environmental Friendly Development."
- Media and information literacy
- **Social Media**
 - Privacy protection in the emerging social media paradigm.
- **E Government**
 - Mobile Governance.
 - e-Governance and service delivery for the poorest of the poor
 - Uses of **ICTs to Promote legal frameworks**
 - Future of governments under the **Smart and Connected Government** that serves its people notion.
- Discuss ways in which stakeholders with limited resources can access the information they need, in the light of emerging observatories
- Importance of open ICT standards development process; increased capabilities and measurements
- Commercial and Open Software
- Clouds and drones
- M2M
- IXPs
- Data and privacy protection
- **Sharing of Best Practices**
 - To share and discuss experiences in drafting and implementing ICT policies;
 - To share and discuss experiences in initiating and implementing ICT projects;
- **Content :**
 - Local content and data as important as the ICTs
 - Multilingualism
 - promotion of native languages with ICT
- Affordability of ICTs
- Financing ICTs
- **Access:**
- Public access to information
- The preservation of **digital cultural heritage** is essential
- **Technology start-ups and tech entrepreneurs:** new economic growth accelerators.
- **E Environment:**

WSIS Forum 2016: Open Consultation Process Preliminary Draft 1.0

- Protecting Earth in all ways, Preserving Wildlife, Connecting with animal and plants
 - E waste management
 - **ICTs and Climate change:** adaption, biodiversity conservation and mitigation
 - Technology in **Disaster Management.**
 - How to spread out all of the ICT facilities in all areas of the countries including small islands in all remote areas.
-
- Making a more sustainable and responsible life.
 - Feelings and technology
 - Internet of Things
 - Digital Identity
 - Digital Innovation for Sustainable development
 - The Future of Work: Impact of new technologies

VII. Suggested Structure

Format (Structure and Programme)

In terms of structure, the contributions indicate that the stakeholders want the Forum to have more time for discussions and dialogue, and less time for presentations.

High-Level Segment: Structure

Much like the answers regarding the general structure of the WSIS Forum 2016, most of the suggestions highlighted the need for the High-Level Segment to be more dynamic and innovative, with more debates and roundtable formats, and less speakers with prepared presentations. There were many suggestions of having the audience participate more, both present as well as online, such as real time questions sent via Twitter. There were also comments on the need to improve gender balance of the selected speakers and also to increase other stakeholders' participations, besides government representatives.

Local, National and Regional Activities

There were a couple of recommendations to organize country workshops at the WSIS Forum, as well as thematic workshops organized with regional participants. The advantage of linking the WSIS Forum with other national and regional events was also emphasized, including recommending that these national and regional events also include SDGs in their agenda. Another point made was that WSIS could help local activities gain more exposure and, possibly, more funding. Suggestions for regional WSIS Forums were also made.

Equal Participation in the Parallel Workshops

In order to guarantee equal participation in the parallel workshops, most of the suggestions emphasized the need to be sure that no two parallel workshops concerning the same topic were occurring simultaneously, and also to try to reduce the number of workshops. There was a suggestion for the WSIS Forum to ask participants to register beforehand for the workshops, in order to plan the talks and activities better, considering how many participants to expect.

Please see below suggestions on the format:

- More “**reporting out**” of main points in a standardized manner that allows aggregation and comparison.
- The **plenary/workshop combination** works well.
- World cafe, lightning talks ,flashes, wiki etc.
- Grassroots **Comics**: a teaching learning tool.
- During invitation only or closed events organize parallel sessions for those who cannot attend
- The TED talks are a good idea

WSIS Forum 2016: Open Consultation Process Preliminary Draft 1.0

- Include **innovative communication** means during workshops such as lightning talks, to highlight the central messages of WSIS and how these will help to achieve the 2030 Agenda.
- Workshops in the form of **Coding session/s** for WSIS delegates
- Ensuring sessions on similar subjects are not run simultaneously
- **Interaction:**
 - This forum could be a good opportunity to facilitate more interaction between policy-makers and also with other stakeholder groups.
 - The WSIS Forum gathers an important group of people. Particularly from governments around the world, including developing countries. Current format, particularly of the High-Level track, is very stiff and with very little dialogue or interactions. Also, the high-level track may compete with more interactive workshops as it has occurred in parallel.
 - More use of inclusive and interactive **round table discussions** rather than large panels of speakers giving prepared remarks.
 - Workshops should encourage more **audio/visual and interactive formats**, rather than numerous experts presenting sequentially.
 - Consider a “match-making market” in which parties can discuss cooperation / partnerships in concrete projects
 - More **interactive format**, with sessions and workshops with less formal presentations and with panels reflecting a great variety of economic and social activities.
 - There should be **more time for audience participation**, and suggestions from the audience should be documented. Rooms to allow **break-up sessions for group work**, a key ingredient for an interactive workshops.
 - Less **PPT presentations** and more dialogue
 - **Shorter session** with fewer participants (eg a debate format) could yield new ideas in a quicker manner and supplement the more in-depth discussions
- **Sharing of Best Practices / WSIS Stocktaking**
 - Better compilation of the best practices collected, and to make use of the diversity of knowledge and perspectives that will be present at the meeting.
 - Sharing **experience by open debates**
 -
 - Experience sharing and showcasing of projects that have been successfully implemented in each country.

WSIS Forum 2016: Open Consultation Process Preliminary Draft 1.0

- WSIS Stocktaking: sharing best practices towards implementing WSIS Action Lines and presenting their linkages with the newly adopted Sustainable Development Goals (SDGs).
- Regional component should be further strengthened by:
 - allowing international and regional intergovernmental entities, other than ITU and WSIS Action Lines Facilitators, to use the WSIS Stocktaking database for collecting and sharing ICT-related projects advancing development and enabling Sustainable Development Goals;
 - strengthening the WSIS Stocktaking process outcomes reporting through producing analytical studies out of the submitted projects based on several themes: regional perspective on replication of the projects, evaluation of the linkages between WSIS Action Lines and Sustainable Development Goals, challenges presented in the submitted projects WSIS action lines’
- Promoting regional ICT projects and initiatives through WSIS Stocktaking platform and publications.
- **Regional and National Level**
 - Enhanced focus on regional issues
 - Needs to be as dynamic as the overall process of growth and development where it needs to address the issues and problem of regional as well as national level.
 - In addition to the thematic format (which works well), there could be an enhanced focus on regional issues. For example, the nature of digital divides will vary between Europe and Africa and having parallel sessions on the overarching theme focused on different regions could be more relevant to participants and provide more specific context to the issues under discussion.
 - Confronting and capitalizing on experience of geographic areas in the world;
 - Identifying the strengths and weaknesses of each region
 - Promotion of the Forum at the Regional level
- **Participation**
 - **Gender equity and geographic representation** are taken into consideration
 - The representation of **children and youth** are mainstreamed
 - Ensuring wide participation at the Forum reaching **beyond the government representatives**.
 - By increasing the visibility of and increase the inclusion of **Persons with Disabilities and Specific Needs** in the WSIS process
 - Facilitate private sector engagement and ensure promoting private sector led initiatives through collaborative approaches.
 - Travel funds for grass-root leaders from the nonprofit sector, who are based in the developing world and are still facing challenges to participate in the WSIS Forum.
 - **Remote Participation for each session**

WSIS Forum 2016: Open Consultation Process Preliminary Draft 1.0

- Possibility to **participate through the social networks**
- Better connectivity for remote speakers
- To ensure equal opportunities and maximum engagement for all participants in the forum, an **electronic system for voicing/capturing their agreement/disagreement on topics** being discussed
- Establish a Multilingual Central Hub (Portal Website) to host the Global Activities, Engagement and Outcomes.
- **Strengthening the Outcomes of the WSIS Forum**
 - Each Annual Forum should produce a **consolidated document containing the outcomes**, as well as the meetings' agendas, workshops, ministerial roundtables, dialogue tables, etc. to provide a summary of the findings.
 - Use **results-focused approach** for each session and workshop
 - **Annual progress review of WSIS process and its contribution to 2030 Agenda for Sustainable Development** is to be the main objective of the WSIS Forum.
 - Recommendations for further implementation of WSIS Action Lines, including analysis of emerged issues and new development trends should be prepared based on the proposals from all WSIS stakeholders, including examples of best practices, analytical database and annual review of Partnership on Measuring ICT for Development, compiled by the Forum's Secretariat.
- Use WSIS Forum platform as an element of Internet Governance Forum, for discussion of international Internet-related public policy issue

VIII. Open Consultation Process Phases

The open consultation process of the WSIS Forum 2016 aims at ensuring the participatory and inclusive spirit of the gathering. It actively engages governments, civil society, the private sector, academia and intergovernmental organizations in the preparatory process ensuring multi-stakeholder participation and constant evolution of the Forum.

ITU, UNESCO, UNCTAD and UNDP invited all WSIS Stakeholders to contribute to the Open Consultation Process on the Thematic Aspects and Innovations on the Format of the WSIS Forum 2016. The invitation letter is available here: http://www.itu.int/net4/wsis/forum/2016/Content/documents/letters/WF16_OCP_Invitation_E.pdf

The Annual WSIS Forum Open Consultation Process was appreciated by the Stakeholders as a platform that provides an equal opportunity to participate in building the Agenda and Programme of the Forum. Better ways of collecting information from the regional and national levels need to be explored some suggested through effective remote participation including using social media and SMS.

WSIS Forum 2016: Open Consultation Process Preliminary Draft 1.0

The Open Consultation Process for the WSIS Forum 2016 is structured in five phases as follows:

Phase I: Opening of the Open Consultation, 4 November 2015

- Online dialogues on the WSIS Knowledge Communities.
- Official Submissions to the WSIS Secretariat on the Thematic Aspects and Innovations on the Format.

Phase II: First Physical Meeting, 20 January 2016, 15:00-18:00, Popov Room, **International Telecommunication Union** :The first physical meeting of the Open Consultation process was held on 20 January 2016 at the ITU Headquarters, Geneva, Switzerland. Remote participation facilities were made available for this meeting.

- [Draft Agenda](#)
- [Presentation](#)
- [Webcast archive](#)

Phase III: Extended Submissions Deadline, 8 February 2016

Deadline for Submission of Official Contributions and Binding Requests for Workshops

Phase IV: Final Review Meeting of the Open Consultation Process, 26 February 2016, 15:00-18:00, Room C, International Telecommunication

Phase V: Final Brief, 1 April 2016

provision of the stable operation, security and confidence while using ICTs as well as the idea of considering these issues from the perspective of their quality. We believe that the promotion of and assistance in the implementation of such approach will enable to achieve significant results in the following Action Lines with the framework of "WSIS+10 Vision for WSIS Beyond 2015":

- C1. The role of public governance authorities and all stakeholders in the promotion of ICTs for development;
- C2. Information and communication infrastructure;
- C5. Building confidence and security in the use of ICTs;
- C6. Enabling environment;
- C11. International and regional

programs and technical assistance programs with the involvement of sponsors on part of business, academy and civil society should also be applied.

levels.

Gender-sensitive Indicators in two Dimensions:

Ø for each sub-themes of 11 Action lines and by

- o workforce
- o ICT accessibility in rural areas for women
- o leadership
- o e-skills
- o digital literacy
- o entrepreneurship

Studies have shown that as in classic cases of vertical gender segregation is prevailing, with women strongly represented in lower level ICT occupations. Therefore more complicated if for each action line would be possible as well to have gender sensitive indicators by workforce, accessibility, leadership, e-skills, digital literacy, entrepreneurship.

ANNEX 2: Submissions received pertaining to the WSIS Action Lines

in society. It will not only enable people to reach their full potential more effectively but it will also actively help to bridge the digital divide, which often is create by income discrepancies. Public access points, such as libraries, are often free, readily available to everyone, and a safe space for learning and information seeking. Libraries help people to not only find information but also to understand the information available through the teaching of Media and Information Literacy skills. Libraries are equal and safe places where the needs of women and youth are addressed. Public access to ICTs in libraries helps marginalised people, youth and women to securely access and process information in order for them to play a crucial role in society.

The UNESCO PERSIST project directly addresses issues raised in the UNGA Overall WSIS Review and the WSIS+10 Vision for WSIS beyond 2015 documents. Preservation of digital cultural heritage is key for the understanding of communities. Best practises and guidelines, created by the project, should be endorsed by WSIS and WSIS should actively encourage member states to participate in the project and implement its outcomes.

ANNEX 2: Submissions received pertaining to the WSIS Action Lines

Action Line C8: Cultural diversity and identity, linguistic diversity and local content

The preservation of digital cultural heritage is essential in order to prevent digital amnesia. Digital amnesia is a threat to every layer of the global community and urgently needs to be addressed. The UNESCO PERSIST project aims to find solution for this problem in order to ensure the digital sustainability of our digital cultural heritage. WSIS needs to address the urgent need of digital preservation in order to prevent decades of data being lost to a digital black hole which will prevent future generations from actively engaging with their communities past. Within WSIS' multi-stakeholder community policies should be created which support the work of PERSIST and
