WHAT IS IFIP?

IFIP – the International Federation for Information Processing - is the global professional body for ICT professionals.

IFIP is a non-profit organisation, which holds over 100 events each year bringing together skilled professionals and thought leaders from ICT industry, research and policy to enable the sharing of knowledge and development of professional standards.

Our members are ICT professional societies and scientific academies from six continents which between them represent over 500,000 individuals and are committed to ensuring that technology is an enabling force to enhance people's lives.

Our members are committed to:

- Develop and Share ICT Knowledge and Expertise

- Promote Global Digital Equity

- Educate and Enhance Public Understanding

- Increase Professionalism and Professional Standards

- Support and Strengthen Each Other
